

Mechanical Technologist (Millwright)

**Sun-Canadian Pipe Line Company Ltd.
Waterdown, ON**

**Posting Date: September 1, 2021
Closing Date: September 30, 2021**

Reporting to the Manager, Maintenance, as a member of the Maintenance team, the Mechanical Technologist is responsible for the mechanical installation, maintenance, repair, and troubleshooting of mechanical and product measurement equipment of the pipeline system. In addition, the Mechanical Technologist maintains and installs mechanical and auxiliary equipment safely and efficiently to meet pipeline operating requirements. The Mechanical Technologist has an important role in analyzing, recommending and advocating solutions to chronic problems and continuously improving the reliability and availability of Sun-Canadian Pipe Line (SCPL) working with the Maintenance Reliability Specialist.

ACCOUNTABILITIES

- Schedule and complete company's mechanical Preventative Maintenance Program.
- Assist in the development and implementation of reliability initiatives across the pipeline network in collaboration with the Maintenance and Reliability Specialist
- Develop and maintain Mechanical procedures and work instructions in collaboration with Maintenance and Reliability Specialist.
- Develop and maintain adequate supplies of spare parts, materials and maintenance services that enable work to be completed as planned in company equipment strategies.
- Ensure that obsolescence of equipment is considered in longer term mechanical planning and that new technologies are being reviewed.
- Build strong positive relationships within Sun-Canadian while troubleshooting and resolving mechanical maintenance issues.
- Provide 24 hour call out support for mechanical equipment and participate in Emergency Response Team.

QUALIFICATIONS

- Post-secondary education and experience as a Red Seal Industrial Mechanic (Millwright) or equivalent journeyman trade qualification.
- 10 or more years of related oil & gas pipeline, refinery or industrial maintenance experience
- Experience with large rotating equipment maintenance.
- Experience with large valve maintenance, operation and repair.
- Good computer skills in Microsoft Office and computerized maintenance management programs.
- Experience with Root Cause Analysis (RCA) and Reliability Centered Maintenance (RCM).
- Good communication skills, both written and oral.
- Capability of making presentations on maintenance topics.

WORK ENVIRONMENT

- Based in Waterdown, ON – small office environment and field work as required
- Provide supervision and direction when required to maintenance staff.
- Field Environment covers facilities from Sarnia to Toronto- significant travel may be required.
- Rotating 24 hour call out responsibilities and emergency response requirements.
